

Navilock GNS ADS-B USB Receiver

Descripción

The GNS 5890 ADS-B receiver enables the reception of signals within the range of 1090 Mhz. These signals will be sent automatically by airplanes all over the world with ADS-B radio transponder. Under good conditions you may have a reception within a radius of 300 km. The included software displays the air route in realtime graphically on a world map.

Número de elemento 60124

EAN: 4043619601240

Pais de origen:
GERMANY

Paquete:

Especificación técnica
