

Navilock Connection Cable MD6 Serial > D-SUB 9 Serial For GNSS Receiver

Description

Navilock GNSS receiver possess an MD6 universal connector. The pin assignment of this connector is identical with chipsets by u-blox, Sony, GLONASS and SiRF. In order to connect the GNSS receiver to a serial port you need this specific connecting cable. It will be connected to the PS2 jack of your notebook, or tablet PC for power supply. The PS2 connector is only a power supply connection and does not transfer a data channel. The data protocol will be provided by the SUB-D9 plug.
